## COLORBACK WB

## COLORLOCK Two-Part Paver Sealer

COLORLOCK is a two-component water-based paver sealer designed for use on concrete pavers, porous stones, bricks, and cement textures. COLORLOCK dries crystal clear and is non-yellowing and non-whitening. This product allows for same-day application over semi-dry substrates and promotes joint stabilization. The color enhancement of COLORLOCK is equivalent to xylene-based paver sealing products.

5 Gallons Makes 10 Gallons!  
Pressure Clean & Seal on the same day!  
Compatible With Most Natural Stones

## Colorback

COLORBACK Paver Sealer is a high-quality xylene-based acrylic sealer designed to protect and beautify concrete & natural stone paver driveways, walkways, pool decks, and patio decks. COLORBACK will protect against ultraviolet fading, mildew formation, surface degradation, and efflorescence whitening. This paver sealer provides a brilliant sheen and a richness of color unmatched by any other paver sealer on the market. Non-skid additives may be added to COLORBACK for slip resistance.

Available in Hi-Gloss and Regular Sheen Options  
Manufactured Since 2005  
One of The Most Reliable Oil-Based Paver Sealers on the Market

## Luxstone Natural Stone Sealer

Luxstone is a water-based clear sealer for porous natural stone pavers available in matte and wet-look options. This paver sealer can be used on travertine, porous marble, slate, limestone, brick, and concrete. Luxstone provides resistance to staining, mildew, water damage, and whitening. An unsealed natural stone surface can quickly absorb permanent stains from everyday food and lifestyle items. Luxstone prevents these liquids from penetrating and permanently staining your deck surface. Additionally, Luxstone will resist mildew stains and provide protection from pool and lawn care chemicals. Your natural stone deck is not complete without Luxstone protection.

Maintain the Natural Look of your stone  
Non-Slip Additives Available for Natural Stone  
Prevents Food & Beverage Staining

## Colorback Water-Based

COLORBACK Water-Based Paver Sealer is a Low-VOC environmentally friendly sealer designed to protect and beautify interlocking concrete pavers. COLORBACK Water-based can be used on driveways, walkways, pool decks, and patio decks. This paver sealer provides a low-luster sheen that will waterproof and protect against UV fading, mildew formation, and surface degradation. Go green without sacrificing the ultimate paver protection!

One Part Ready-to-use Water-Based Sealer
